If an assessment objective has been omitted at subject cohort level, please briefly explain why:

All AOs taught across the course

Outline the rationale for the choice of evidence used i.e. why it was used and how it supported the grading decision:

Questions are all in the style of past exam questions and have been adapted to take account of the in class teaching at the point of the assessment. The questions test the same AOs as per the exam. All assessments are end of unit assessments that have been completed in class. Where control is medium these are assessments completed in class by the class teacher without any teaching of the extracts and task and have been marked across the faculty and moderated.

Where control is low these have happened at the end of a unit of work and may have been supported by the class teacher through discussions / answering student questions, students also had exercise books to look back through and these are teacher assessed.

Fairness and consistency of marking:
